

GENERAL NOTES
 All work to be carried out in accordance with the Building Code of Australia, all Local and State Government Ordinances, relevant Australian Standards, Local Authorities Regulations and all other relevant Authorities concerned. All structural work and site drainage to be subject to Engineer's details or certification where required by Council. This shall include r.c. slabs and footings, r.c. and steel beams & columns, wind bracing to AS 1170 and AS4055, anchor rods or bolts, tie downs, fixings etc., driveway slabs and drainage to Council's satisfaction. All timbers to be in accordance with SAA Timber Structure Code AS1720 and SAA Timber Framing Code AS 1684. All work to be carried out in a professional and workman- shiplike manner according to the plans and specification.

NOTE
 Do not scale off the drawings unless otherwise stated and use figured dimensions in preference.
 All dimensions are to be checked and verified on site before the commencement of any work, all dimensions and levels are subject to final survey and set-out.
 No responsibility will be accepted by Sitedesign for any variations in design, builder's method of construction or materials used, deviation from specification without permission or accepted work practices resulting in incorrect construction. Locate and protect all services prior to construction.
COPYRIGHT CLAUSE

	CONCRETE AGGREGATE Type 2

Landscape Design Statement:
 The landscape design of the Stage 2 works has been designed in keeping with the local character of the area. Overall the majority of the planting is native with use of exotic plants for entry areas and courtyards as accents best suited for the solar access and amenity of the space. The use of native canopy trees planted in areas away from the built form has been proposed so the trees can grow to maturity. Shade loving plants are used in areas such as courtyards and southern sides of buildings to best suit the growing conditions. In full sun more native and flowering plants have been used to take advanced on the sunlight. The landscape design includes a matrix of different plant species as layered planting from grasses, ground-covers, small to large shrubs, small to large canopy trees to provide an informal landscape design with lots of interest in plant form, texture, colour and scent.

Lomandra tanika Fine leafed mat rush

GENERAL NOTES
 All work to be carried out in accordance with the Building Code of Australia, all Local and State Government Ordinances, relevant Australian Standards, Local Authorities Regulations and all other relevant Authorities concerned. All structural work and site drainage to be subject to Engineer's details or certification where required by Council. This shall include r.c. slabs and footings, r.c. and steel beams & columns, wind bracing to AS 1170 and AS4055, anchor rods or bolts, tie downs, fixings etc., driveway slabs and drainage to Council's satisfaction. All timbers to be in accordance with SAA Timber Structure Code AS1720 and SAA Timber Framing Code AS 1684. All work to be carried out in a professional and workman- shiplike manner according to the plans and specification.
NOTE
 Do not scale off the drawings unless otherwise stated and use figured dimensions in preference.
 All dimensions are to be checked and verified on site before the commencement of any work, all dimensions and levels are subject to final survey and set-out
 No responsibility will be accepted by Sitedesign for any variations in design, builder's method of construction or materials used, deviation from specification without permission or accepted work practices resulting in inferior construction. Locate and protect all services prior to construction.
COPYRIGHT CLAUSE
 This drawing and design is the property of Sitedesign and should not be reproduced either in part or whole without the written consent of this firm.
