Noise Monitoring Daily Results

1 Introduction

Arup has been retained to carry on with the work originally contracted by PwC/Scyne. The work included the installation of noise monitors in various locations within the Westmead Precinct and the reporting of noise levels recorded. The noise loggers are within the Central Acute Services Building (CASB), Children's Hospital Westmead (CHW) and Kids Research (KR) and Ronald McDonald House (RMH) buildings to monitor construction noise from the Paediatric Service Building (PSB) and Multi Storey Car Park (MSCP) development sites in the Westmead Precinct.

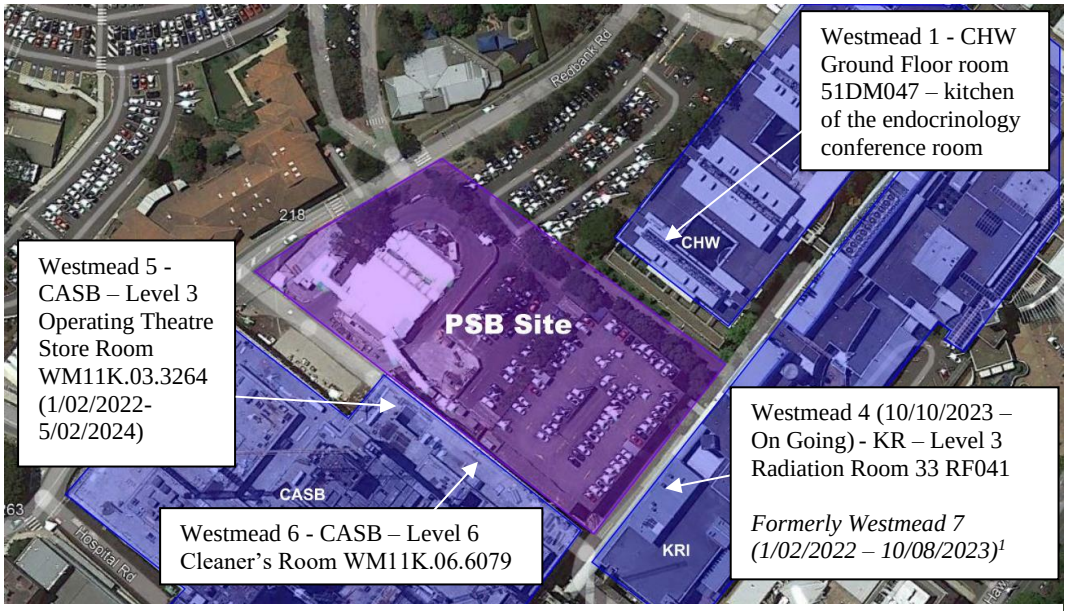
The noise loggers are configured to send email and SMS notifications to stakeholders when construction Noise Management Levels (NMLs) are exceeded.

This report details noise measurement results from **1 March 2024 to 31 March 2024** inclusive.

2 Noise logger locations

Acoustic Research Labs Ngara noise loggers have been installed in the locations shown in Figure 1 and Figure 2 below.

The noise loggers were calibrated by Acoustic Research Labs (NATA-accredited calibration) in November 2021. In accordance with NATA standards, the noise loggers should be recalibrated every two years. Consequently, Arup has initiated the organisation of the recalibration of the loggers.



Note 1: Westmead 7 noise logger was temporarily repurposed for another project on the 10/8/2023. See Section 0.

Figure 1: PSB noise monitoring locations.

Figure 2: MSCP noise monitoring locations.

2.1 Noise Logger relocation

- No monthly update.

A summary of all noise logger relocations can be found in Table 1 below:

Table 1: Logger relocation records

Logger ID	**Original Location**	**Location**	
	Location	**Date Moved**	**Location**
Westmead 7	KR Level 3 Radiation Room 33 RF041	10/8/23	*Removed from site to support another project (VVMF project)*
Westmead 4	Off site to support another project (VVMF project)	10/10/23	KR Level 3 Radiation Room 33 RF041
Westmead 1	CHW Ground Floor room 51DM047	18/10/23	*Removed from site for manufacturer calibration*
Westmead 2	CHW Level 2 Parent Kitchen 92BW025	18/10/23	*Removed from site for manufacturer calibration*
Westmead 3	RMH Level 1 Store Room 101	18/10/23	*Removed from site for manufacturer calibration*
Westmead 1	*Removed from site for manufacturer calibration*	6/12/23	CHW Ground Floor room 51DM047
Westmead 2	*Removed from site for manufacturer calibration*	6/12/23	CHW Level 2 Parent Kitchen 92BW025
Westmead 3	*Removed from site for manufacturer calibration*	6/12/23	RMH Level 1 Store Room 101
Westmead 4	KR Level 3 Radiation Room 33 RF041	6/12/23	*Removed from site for manufacturer calibration*

Westmead 5	CASB Level 3 Operating Theatre Store Room WM11K.03.3264	6/12/23	*Removed from site for manufacturer calibration*
Westmead 4	*Removed from site for manufacturer calibration*	12/21/23	KR Level 3 Radiation Room 33 RF041
Westmead 5	*Removed from site for manufacturer calibration*	12/21/23	CASB Level 3 Operating Theatre Store Room WM11K.03.3264
Westmead 6	CASB Level 6 Cleaner's Room WM11K.06.6079	5/02/2024	*Removed from site for manufacturer calibration*
Westmead 4	KR Level 3 Radiation Room 33 RF041	5/02/2024	*Removed from site for repair*
Westmead 5	CASB Level 3 Operating Theatre Store Room WM11K.03.3264	5/02/2024	*Removed from site to support another project (VVMF project)*

3 Noise Management Levels

The current construction Noise Management Levels for each internal monitoring location are set out in Table 2.

Measurement data taken from 'standard' construction work hours for the project only are assessed against the Noise Management Level criteria, being:

- 7am-6pm Mon-Fri
- 8am-1pm Sat
- No work on Sundays and Public Holidays.

As part of the previous installation works a baseline noise study was conducted to determine appropriate noise management level. Refer to Arup's *Baseline noise measurements* report [1] for details regarding how these Management Levels were nominated.

Table 2: Baseline noise measurement results.

Logger ID	**Location**	**Noise Management Level (upper limit), dB $L_{Aeq,15min}$**
Westmead 1	CHW Ground Floor room 51DM047 – kitchen of the endocrinology conference room (facing PSB site)	**60**
Westmead 2	CHW Level 2 Parent Kitchen 92BW025 (facing MSCP site)	**64**
Westmead 3	RMH Level 1 Store Room 101 (facing MSCP site)	**47**
Westmead 4	KR Level 3 Radiation Room 33 RF041(facing PSB site)	**58**
Westmead 5	CASB Level 3 Operating Theatre Store Room WM11K.03.3264 (facing PSB site)	**50**
Westmead 6	CASB Level 6 Cleaner's Room WM11K.06.6079 (facing PSB site)	**52**

3.1 Management Level updates

- None to date.

4 Noise monitoring results

4.1 Outages

Noise monitoring outages are shown below. This excludes outages related to logger data collection and calibration.

Table 3: Noise logger outages during monitoring period.

Logger Id	Noise logger location	Outages
Westmead 1	CHW Ground Floor room 51DM047 – kitchen of the endocrinology conference room (facing PSB site)	3/03/2024: 10:30 – 13:00
Westmead 5	CASB Level 3 Operating Theatre Store Room WM11K.03.3264 (facing PSB site)	1/03/2024 – 31/02/2024
Westmead 6	CASB Level 6 Cleaner's Room WM11K.06.6079 (facing PSB site)	1/02/2024 – On Going[2]
Westmead 4	KR Level 3 Radiation Room 33 RF041(facing PSB site)	1/02/2024 – On Going[2]
Westmead 7	KR Level 3 Radiation Room 33 RF041(facing PSB site)	N/A[1]
Westmead 2	CHW Level 2 Parent Kitchen 92BW025 (facing MSCP site)	3/03/2024: 07:30 – 17:45 16/03/2024 – 28/03/2024
Westmead 3	RMH Level 1 Store Room 101 (facing MSCP site)	–

Note:

1. Westmead 7 logger was relocated to the WIMR bike store room on Thursday 10 August 2023 to support the VVMF construction project.
2. Westmead 6 and Westmead 4 loggers were removed for calibration and repair and await instruction for redeployment.

4.2 Exceedances

The number of Management Level exceedances recorded at each noise monitoring location during the assessment period are shown below.

Table 4: Recorded Management Level exceedances.

Logger Id	Noise logger location	Noise Management Level exceedance instances
Westmead 1	CHW Ground Floor room 51DM047 – kitchen of the endocrinology conference room (facing PSB site)	18
Westmead 5	CASB Level 3 Operating Theatre Store Room WM11K.03.3264 (facing PSB site)	-
Westmead 6	CASB Level 6 Cleaner's Room WM11K.06.6079 (facing PSB site)	-
Westmead 4	KR Level 3 Radiation Room 33 RF041(facing PSB site)	-

Logger Id	Noise logger location	Noise Management Level exceedance instances
Westmead 7	KR Level 3 Radiation Room 33 RF041(facing PSB site)	N/A[1]
Westmead 2	CHW Level 2 Parent Kitchen 92BW025 (facing MSCP site)	9
Westmead 3	RMH Level 1 Store Room 101 (facing MSCP site)	17

Note 1: Westmead 7 logger was relocated to the WIMR bike store room on Thursday 10 August 2023 to support the VVMF construction project, hence all potential exceedances recorded by this logger are currently not relevant for this project.

It is the responsibility of the Principal Contractor to respond to each Noise Management Level exceedance when it occurs and record the outcome of the exceedance investigation (cause of NML exceedance, any noise mitigation measures implemented to address the exceedance, etc.).

4.3 Daily noise monitoring results

Daily noise monitoring results are showing for each location in Appendix A.

1. Introduction

Arup has been commissioned by Health Infrastructure NSW to install a noise monitor within the Westmead Institute for Medical Research (WIMR) to monitor and manage noise from the construction of the Viral Vector Manufacturing Facility (VVMF) in the Westmead Precinct.

The noise logger was deployed on the 8th of March 2023 and has been setup to send email and SMS notifications to stakeholders when construction Noise Management Levels (NMLs) are exceeded.

This report details noise measurement results from **1 March 2024** to **31 March 2024** inclusive.

2. Noise logger location

One Acoustic Research Labs Ngara noise logger is installed at the location shown in Figure 1 below.

Westmead 5 was calibrated by Acoustic Research Labs (NATA accredited calibration) in December 2023.

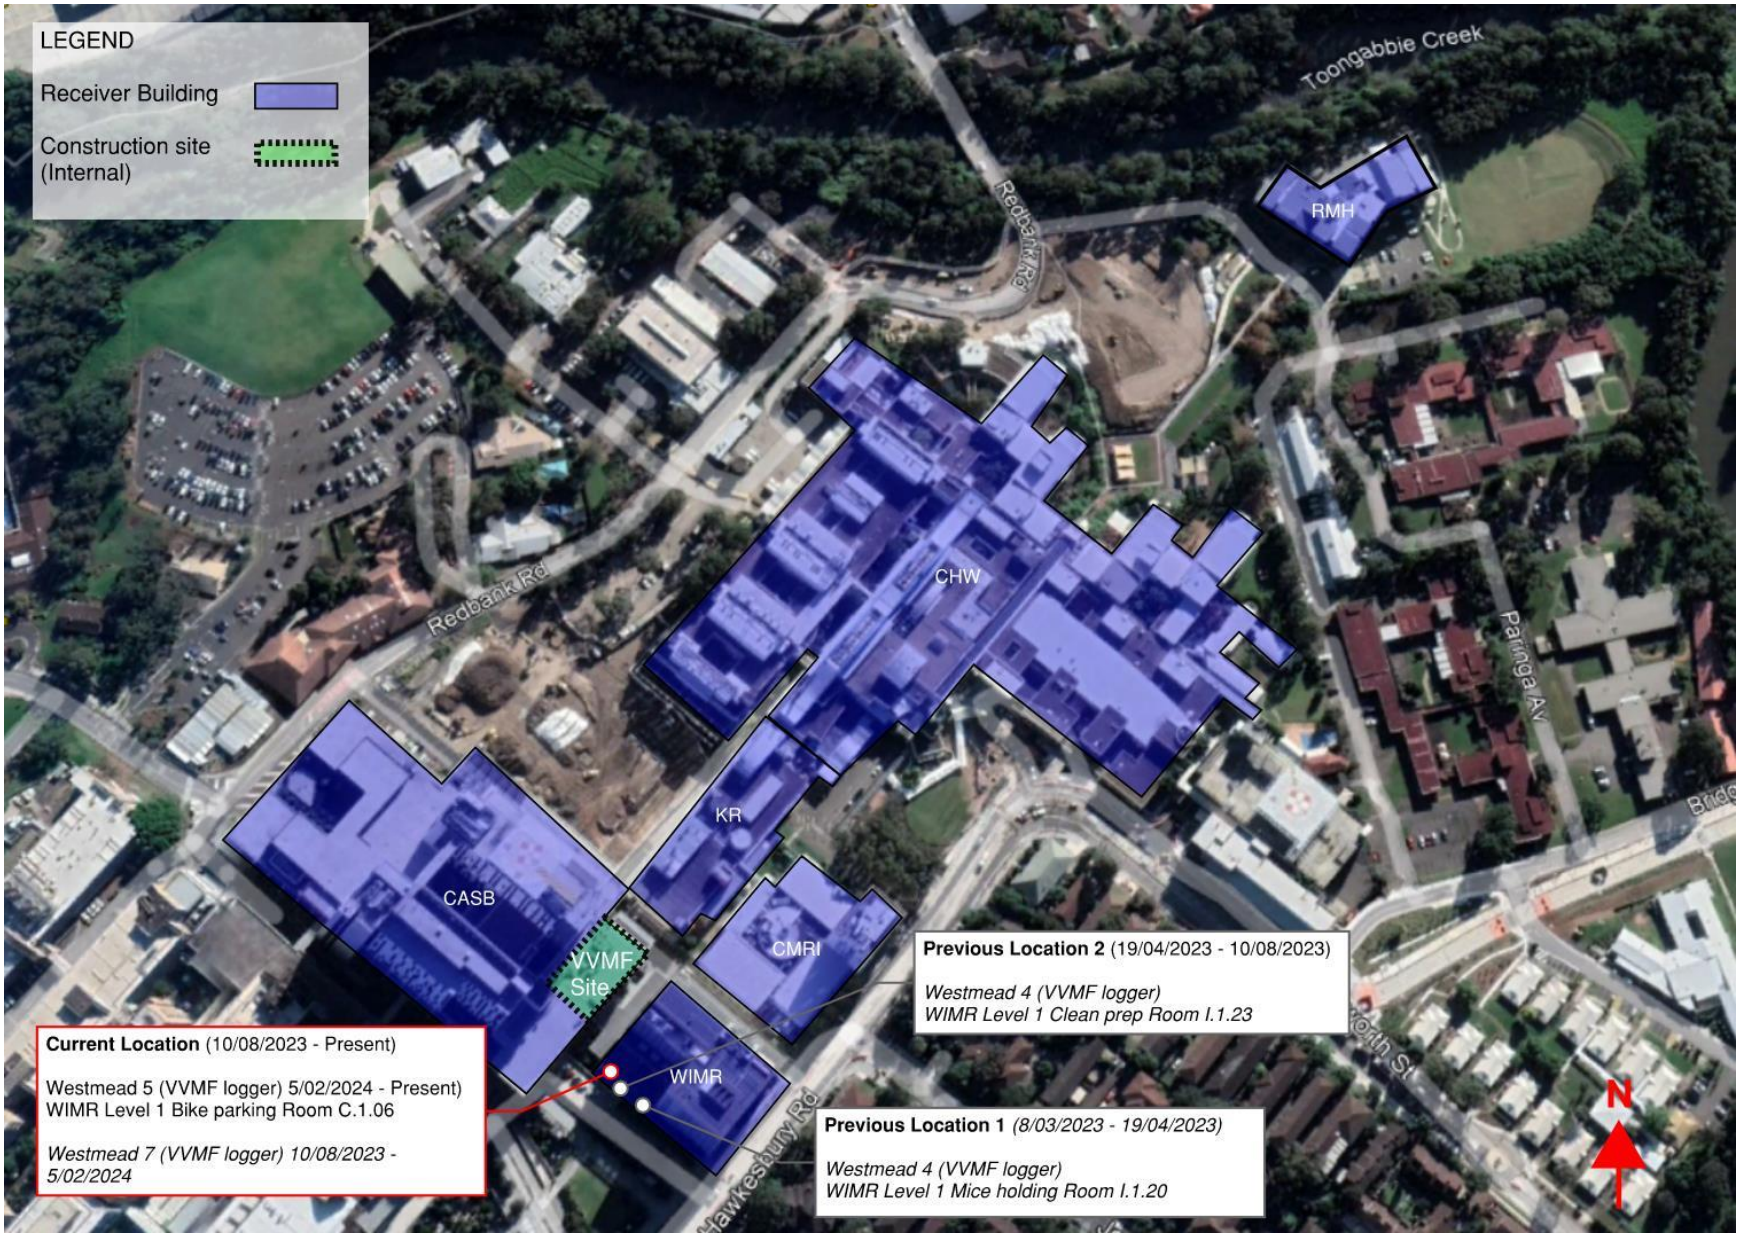

Figure 1: VVMF noise monitoring locations

2.1 Noise logger relocation

A summary of all logger relocations can be found in Table 1 below.

Table 1: Logger relocation records

Logger ID	Original Location	Location	
	Location	Date moved	Location
Westmead 4[1]	WIMR Level 1 Mice holding room (I.1.20)	19/4/2023	WIMR Level 1 Clean Prep Room (I.1.23)
Westmead 4	WIMR Level 1 Clean Prep Room (I.1.23)	10/08/2023	*Removed from site*
Westmead 7	KR Level 3 Radiation Room (RF041)	10/08/2023	WIMR Level 1 Bike Parking room (C.1.06)
Westmead 7	WIMR Level 1 Bike Parking room (C.1.06)	5/02/2024	*Removed from site*
Westmead 5	*Supporting a different project*	5/02/2024 (Current)	WIMR Level 1 Bike Parking room (C.1.06)

Notes:

1. Greyed out text is included to summarize all logger swapping and relocations that have taken place throughout the duration of the project.

3. Noise Management Levels

The current Construction Noise Management Levels (NMLs) are set out in Table 2. The NMLs have been determined following a baseline noise study conducted in April 2023. (Refer to Arup's *Westmead Hospital N&V Monitoring – Attended Noise Measurements – VVMF Construction Activity*[1] memo for details regarding how these NMLs were nominated.)

Measurement data taken from 'standard' construction work hours for the project only are assessed against the Noise Management Level criteria, being:

- 7am-6pm Mon-Fri
- 8am-1pm Sat
- No work on Sundays and Public Holidays.

The NMLs levels in Table 2 were determined following both the review of current noise levels within the mice holding room when no construction was conducted, and available information with regards to the sensitivity to noise of research animals. The NMLs below represent the level of construction noise if exceeded may result in a negative impact on research animals.

To safeguard the research animals, the previously established NMLs were retained despite relocating the logger. However, it is important to note that the results may be conservative due to the logger's closer proximity to the construction works.

Table 2: Noise Management Levels

Logger ID	Location	Noise Management Level, dB	Description
Westmead 4 (8/03/2023 – 19/04/2023)	WIMR Level 1 Mice holding room (I.1.20)	L_{Amax} 85	For short duration high noise levels
		$L_{Aeq(1minute)}$ 69	For more continuous noise generation
Westmead 4 (19/04/2023 – 10/08/2023)	WIMR L1 Clean Prep Room (I.1.23)	L_{Amax} 85	For short duration high noise levels
		$L_{Aeq(1minute)}$ 69	For more continuous noise generation
Westmead 7 (10/08/2023 – 5/02/2024)	WIMR L1 Bike Room (C.1.06)	L_{Amax} 85	For short duration high noise levels
		$L_{Aeq(1minute)}$ 69	For more continuous noise generation
Westmead 5 (5/02/2024 – On Going)	WIMR L1 Bike Room (C.1.06)	L_{Amax} 85	For short duration high noise levels
		$L_{Aeq(1minute)}$ 69	For more continuous noise generation

3.1 Management Level updates

The following provides a progressive record of management level updates:

- None-to-date

[1] Arup report reference: 283812-16

4. Noise monitoring results

4.1 Outages

Noise monitoring outages are shown below. This excludes outages related to logger data collection and calibration.

Table 3: Noise logger outages during monitoring period

Logger ID	Noise logger location	Outages
Westmead 5	WIMR L1 Bike Room (C.1.06)	-

4.2 Exceedances

The number of Noise Management Level exceedances recorded during the assessment period are shown below.

Table 4: Recorded NML exceedances

Logger Id	Noise logger location	Noise Management Level exceedance instances	
		Short duration L_{Amax} criteria	Continuous $L_{Aeq(1minute)}$ criteria
Westmead 5	WIMR L1 Bike Room (C.1.06)	20	13

It is noted that the exceedances of the NMLs may be the result of noise generated by either internal activities unrelated to construction, or by construction activities.

It is the responsibility of the Principal Contractor to respond to each NML exceedance when it occurs and record the outcome of the exceedance investigation (cause of NML exceedance, any noise mitigation measures implemented to address the exceedances, etc.).

Executive Summary.....3
1. Introduction.....4
2. Monitor Location.....4
3. Recorded Data.....5

Executive Summary

This report summarises the vibration monitoring data recorded at KR Level 4 in Room 44-4873, over one month – from 01/03/2024 to 31/03/2024. Graphs in this report show the recorded data in blue, and exceedance trigger levels in red.

RMS Acceleration Levels

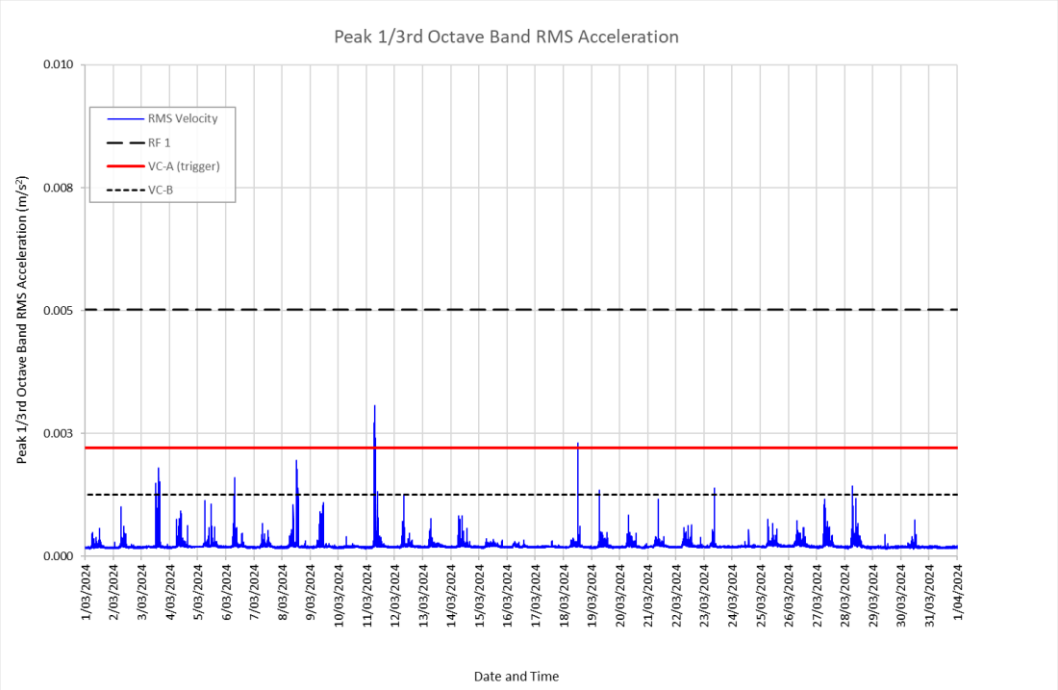

Figure 1: Measured RMS acceleration vibration levels at the KR L4.

The table below summarises the number of Root-Mean-Square Acceleration limit exceedances recorded during and outside of construction hours at KR L4 Lab.

During Construction Hours	Outside of Construction Hours
31	0

1. Introduction

Arup has been commissioned by PricewaterhouseCoopers (PwC) on behalf of NSW Health Infrastructure to monitor vibration levels in facilities adjacent to the Paediatric Services Building and Forecourt development sites to ensure facility operations are not excessively impacted by the construction works. This report summarises the vibration monitoring data recorded at KR – L4 Room 44-4873 during the period of the 01/03/2024 to 31/03/2024.

For the purposes of reporting, construction works are considered to be occurring at the following times:

Day	Construction Hours
Monday to Friday	7:00am to 6:00pm
Saturday	8:00am to 1:00pm
Sunday	No works
Public Holidays	No works

2. Monitor Location

The location of this monitor is shown below in Figure 2.

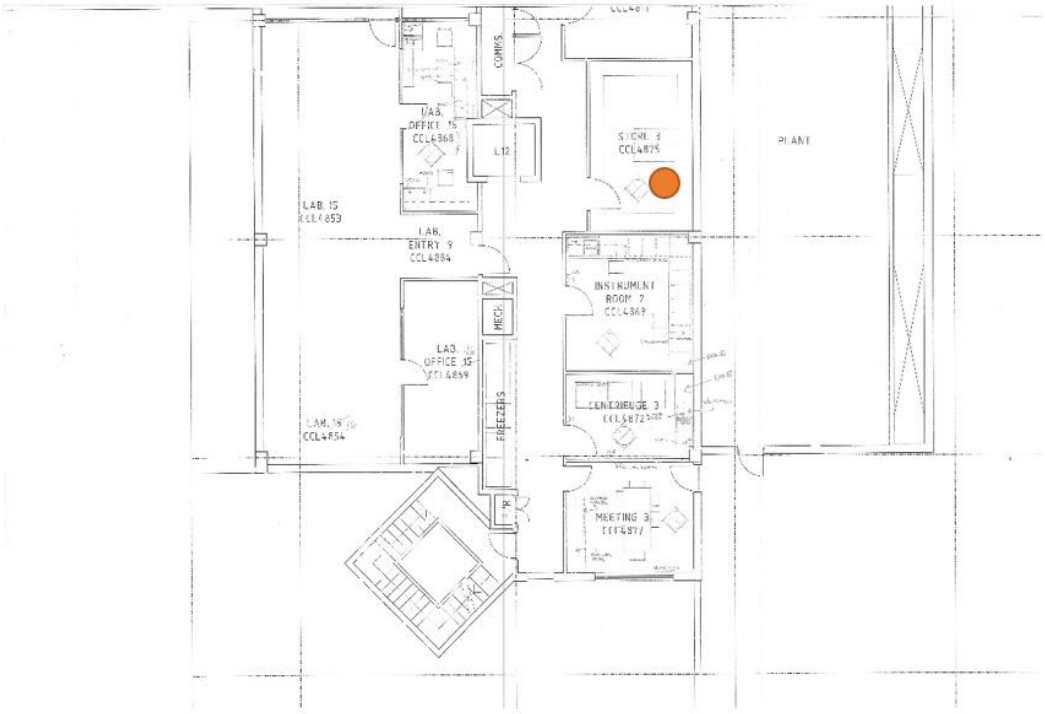

Figure 2: KR – L4 vibration monitor location

Monitoring at this location utilises a SVAN 958AG (SN 59827) with a triaxial accelerometer (SA207B).

3. Recorded Data

Figure 3 below shows the vibration levels (RMS acceleration) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.0025 m/s^2 (VC-A) is shown in red.

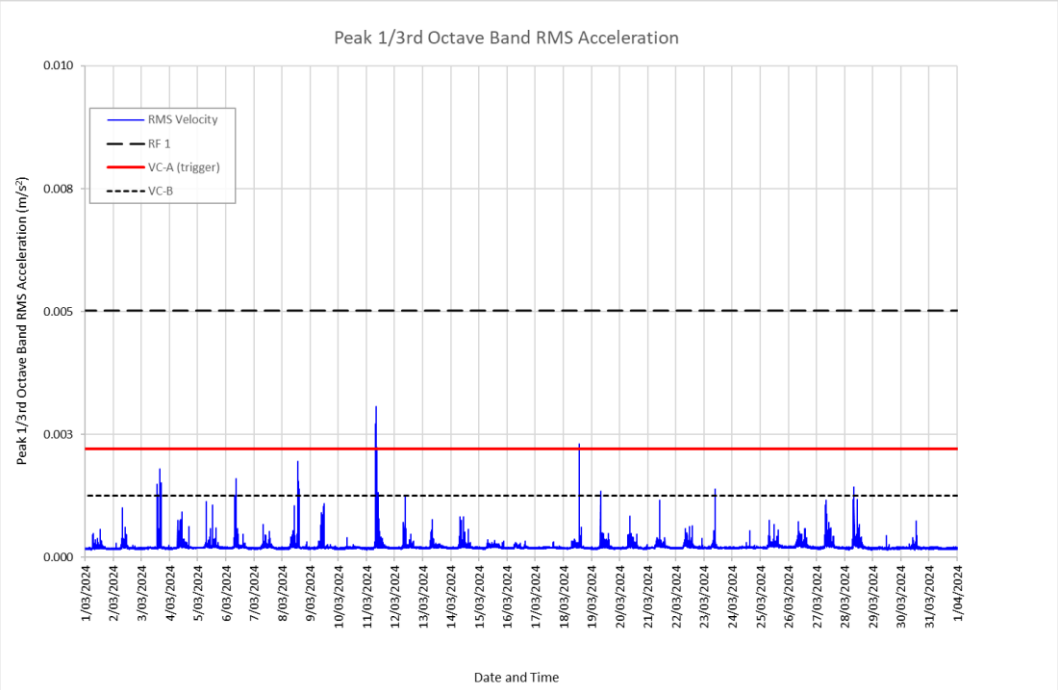

Figure 3: Measured RMS acceleration vibration levels for 01/03/2043 to 31/032/2024 at KR – L4.

The table below summarises the number of Root-Mean-Square Acceleration limit exceedances recorded during and outside of construction hours at KR L4 Lab.

Executive Summary....3
1. Introduction....4
2. Monitor Location....4
3. Recorded Data....5
Appendix A: Calibration Certificates....6

Executive Summary

This report summarises the vibration monitoring data recorded at SCHN L1 Endocrinology Lab, over one month – from 01/03/2024 to 31/03/2024. Graphs in this report show the recorded data in blue, and exceedance trigger levels in red.

RMSV Vibration Levels

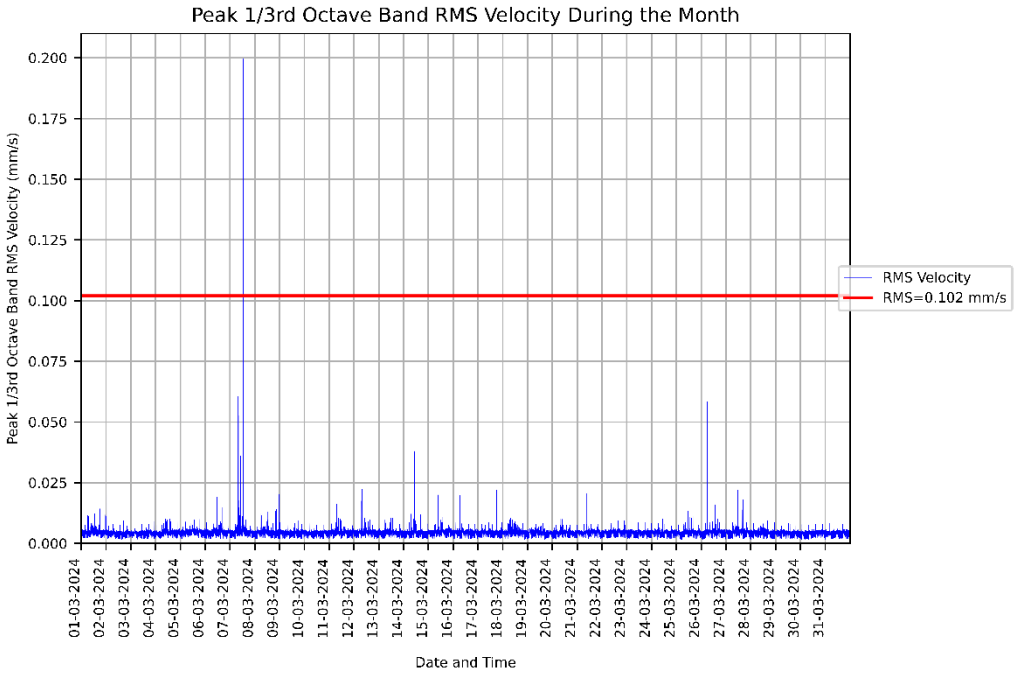

Figure 1: Measured RMSV vibration levels for 01/03/2024 to 31/03/2024 at the SCHN L1 Endocrinology Lab.

The table below summarises the number of Root-Mean-Square Velocity (RMSV) limit exceedances recorded during and outside of construction hours.

During Construction Hours	Outside of Construction Hours
3	0

1. Introduction

Arup has been commissioned by PricewaterhouseCoopers (PwC) on behalf of NSW Health Infrastructure to monitor vibration levels in facilities adjacent to the Paediatric Services Building and Multi-storey Car Park development sites to ensure facility operations are not excessively impacted by the construction works. This report summarises the vibration monitoring data recorded at SCHN L1 Endocrinology Lab during the period of the 01/03/2024 to 31/03/2024.

For the purposes of reporting, construction works are considered to be occurring at the following times:

Day	Construction Hours
Monday to Friday	7:00am to 6:00pm
Saturday	8:00am to 1:00pm
Sunday	No works
Public Holidays	No works

2. Monitor Location

The location of this monitor is shown below in Figure 3.

Figure 3: SCHN L1 Endocrinology Lab vibration monitor location shown in orange

Monitoring at this location utilises a GeoSIG GMSplus with a GeoSIG VE-11 geophone. The calibration certificate for the geophone is included in Appendix A.

3. Recorded Data

Figure 4 below shows the vibration levels (RMS velocity) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.102mm/s (V_{RMS}) is shown in red.

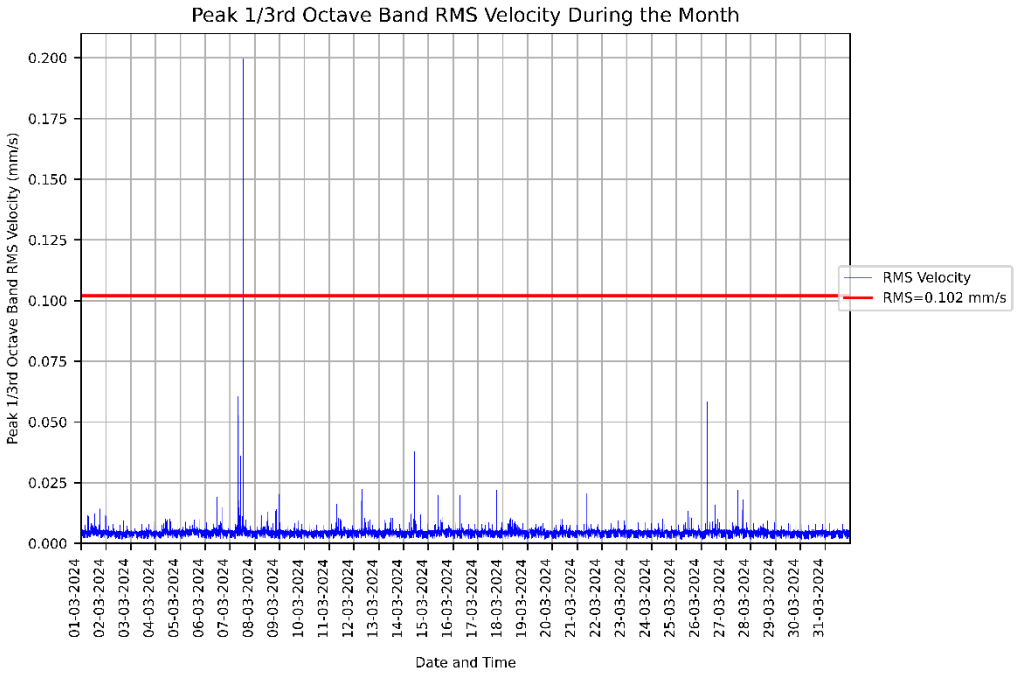

Figure 4: Measured RMSV vibration levels for 01/03/2024 to 31/03/2024 at the SCHN L1 Endocrinology Lab.

The table below summarises the number of RMS Velocity limit exceedances recorded during and outside of construction hours.

Executive Summary

This report summarises the vibration monitoring data recorded at WIMR - BSF Mice Holding Room - Floor, over one month – from 01/03/2024 to 31/03/2024. Graphs in this report show the recorded data in blue, and exceedance trigger levels in red.

RMSV Vibration Levels

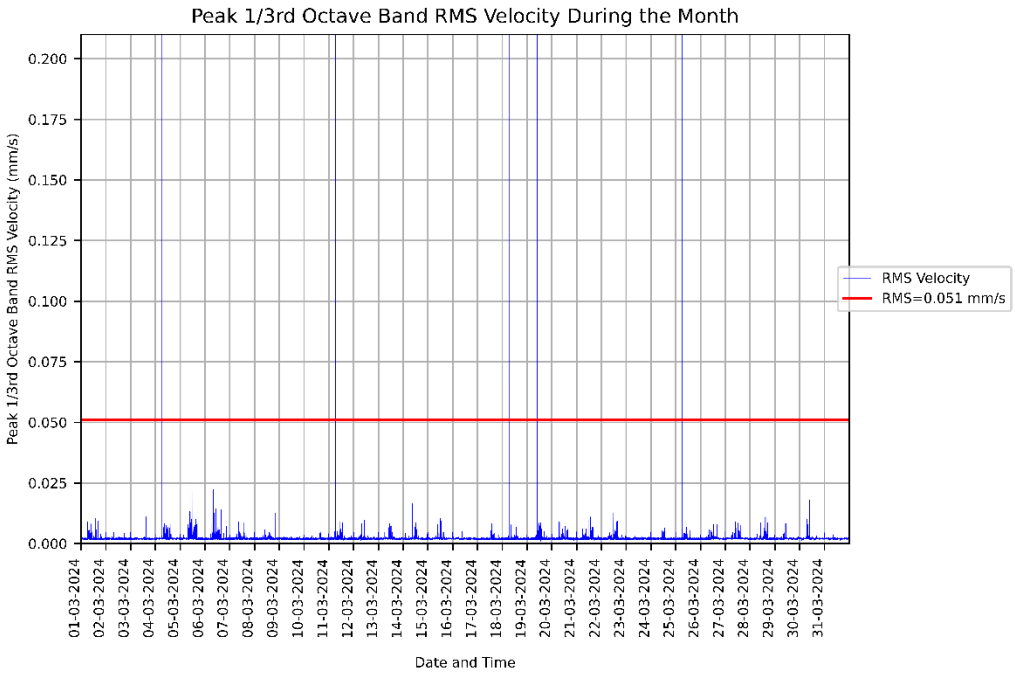

Figure 1: Measured RMSV vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Floor.

The table below summarises the number of Root-Mean-Square Velocity (RMSV) limit exceedances recorded during and outside of construction hours.

During Construction Hours	Outside of Construction Hours

PPV Vibration Levels

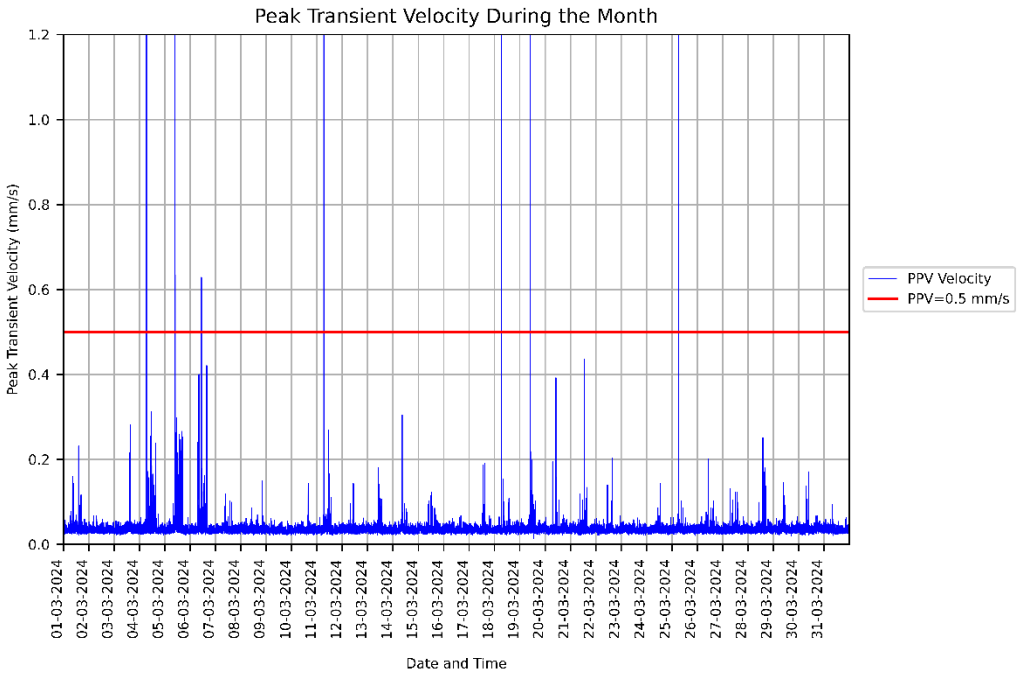

Figure 2: Measured vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Floor.

The table below summarises the number of Peak Particle Velocity (PPV) limit exceedances recorded during and outside of construction hours.

During Construction Hours	Outside of Construction Hours
4	4

1. Introduction

Arup has been commissioned by PricewaterhouseCoopers (PwC) on behalf of NSW Health Infrastructure to monitor vibration levels in facilities adjacent to the VVMF development sites to ensure facility operations are not excessively impacted by the construction works. This report summarises the vibration monitoring data recorded at WIMR - BSF Mice Holding Room - Floor during the period of the 01/03/2024 to 31/03/2024.

For the purposes of reporting, construction works are considered to be occurring at the following times:

Day	Construction Hours
Monday to Friday	7:00am to 6:00pm
Saturday	8:00am to 1:00pm
Sunday	No works
Public Holidays	No works

2. Monitor Location

The location of this monitor is shown below in Figure 3.

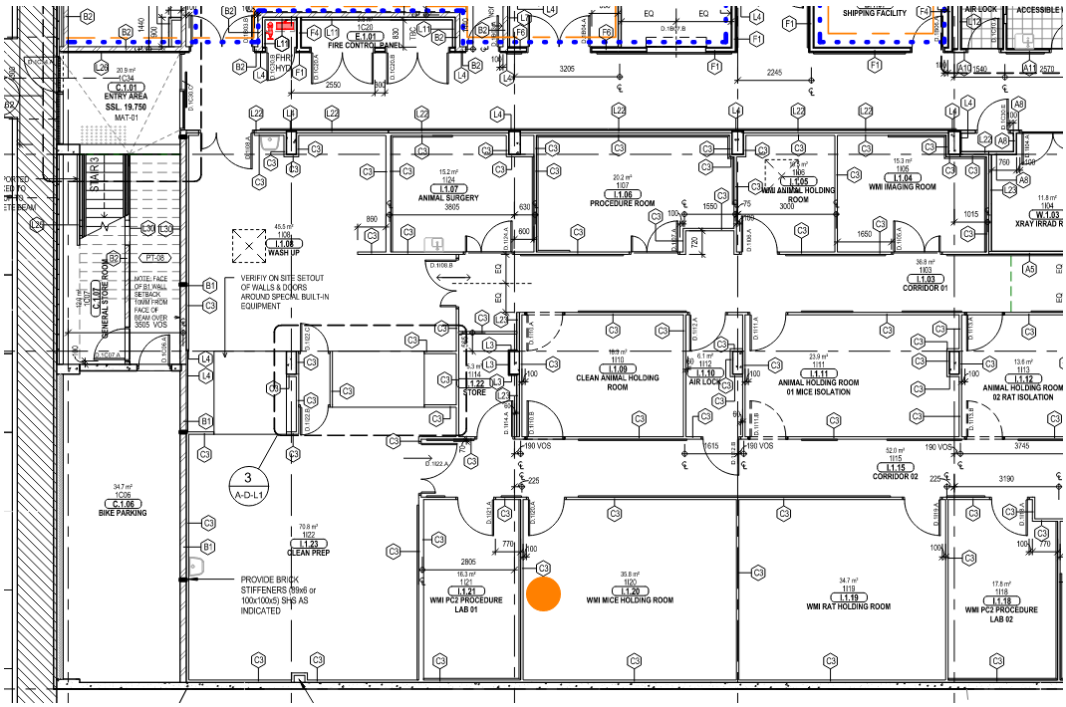

Figure 3: WIMR - BSF Mice Holding Room - Floor vibration monitor location

Monitoring at this location utilises a GeoSIG GMSplus with a GeoSIG VE-11 geophone. The calibration certificate for the geophone is included in Appendix A.

3. Recorded Data

Figure 4 below shows the vibration levels (RMS velocity) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.051mm/s (V_{RMS}) is shown in red.

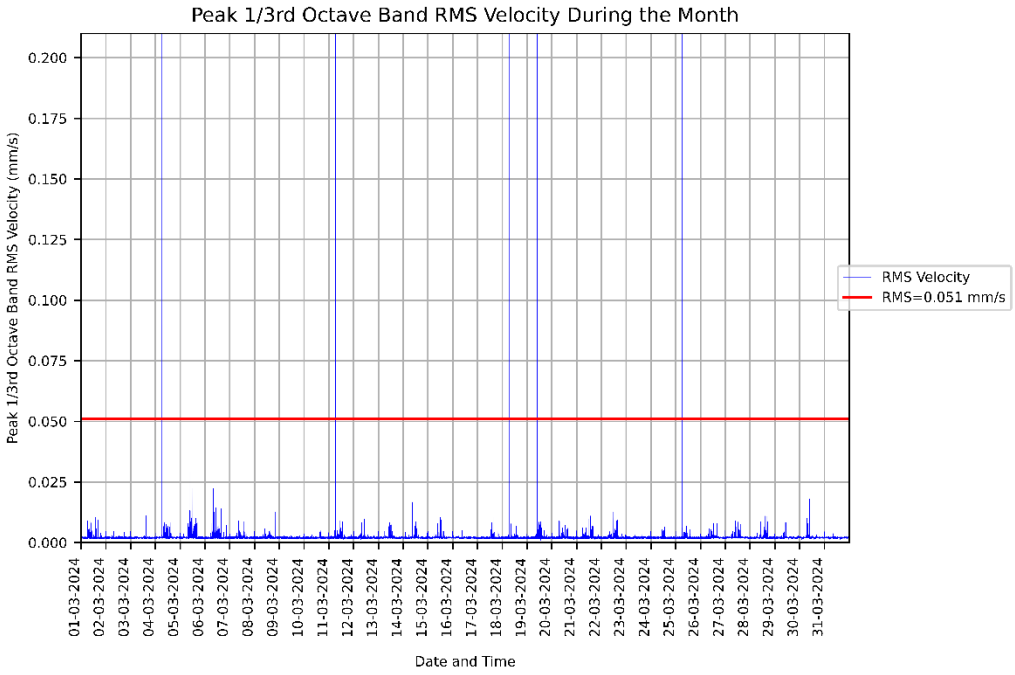

Figure 4: Measured RMSV vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Floor.

The table below summarises the number of RMS Velocity limit exceedances recorded during and outside of construction hours.

During Construction Hours	Outside of Construction Hours
2	4

Figure 5 below shows the peak particle vibration levels (PPV velocity) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.5mm/s (V_{PPV}) is shown in red.

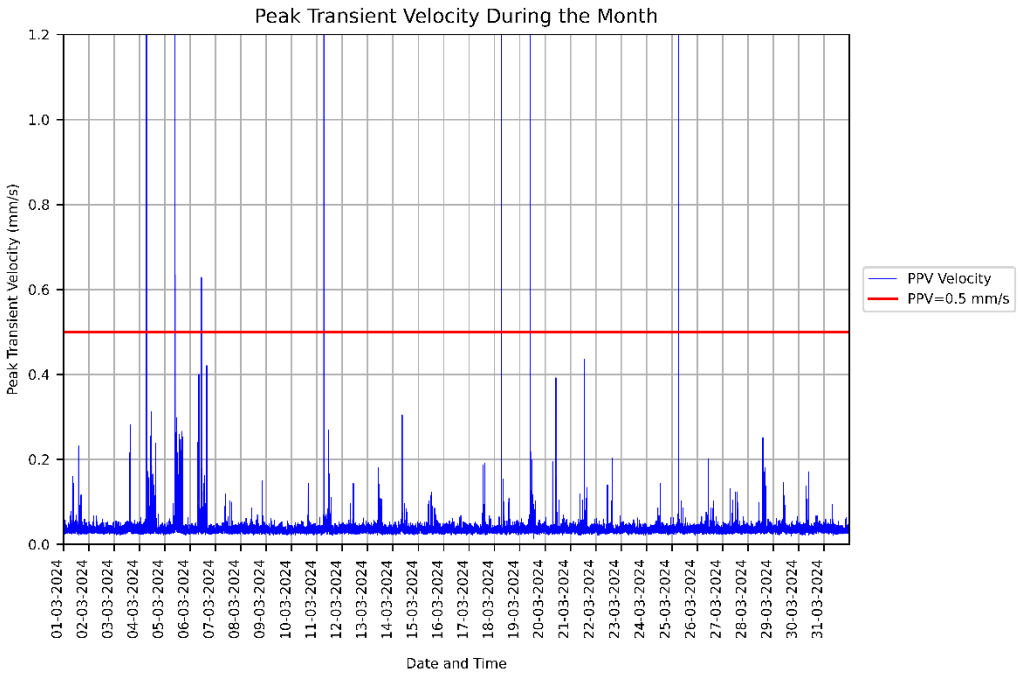

Figure 5: Measured PPV vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Floor.

The table below summarises the number of PPV limit exceedances recorded during and outside of construction hours.

1. Introduction

Arup has been commissioned by PricewaterhouseCoopers (PwC) on behalf of NSW Health Infrastructure to monitor vibration levels in facilities adjacent to the VVMF Innovation Centre development sites to ensure facility operations are not excessively impacted by the construction works. This report summarises the vibration monitoring data recorded at WIMR - BSF Mice Holding Room - Rack during the period of the 01/03/2024 to 31/03/2024.

For the purposes of reporting, construction works are considered to be occurring at the following times:

Day	Construction Hours
Monday to Friday	7:00am to 6:00pm
Saturday	8:00am to 1:00pm
Sunday	No works
Public Holidays	No works

2. Monitor Location

The location of this monitor is shown below in Figure 3.

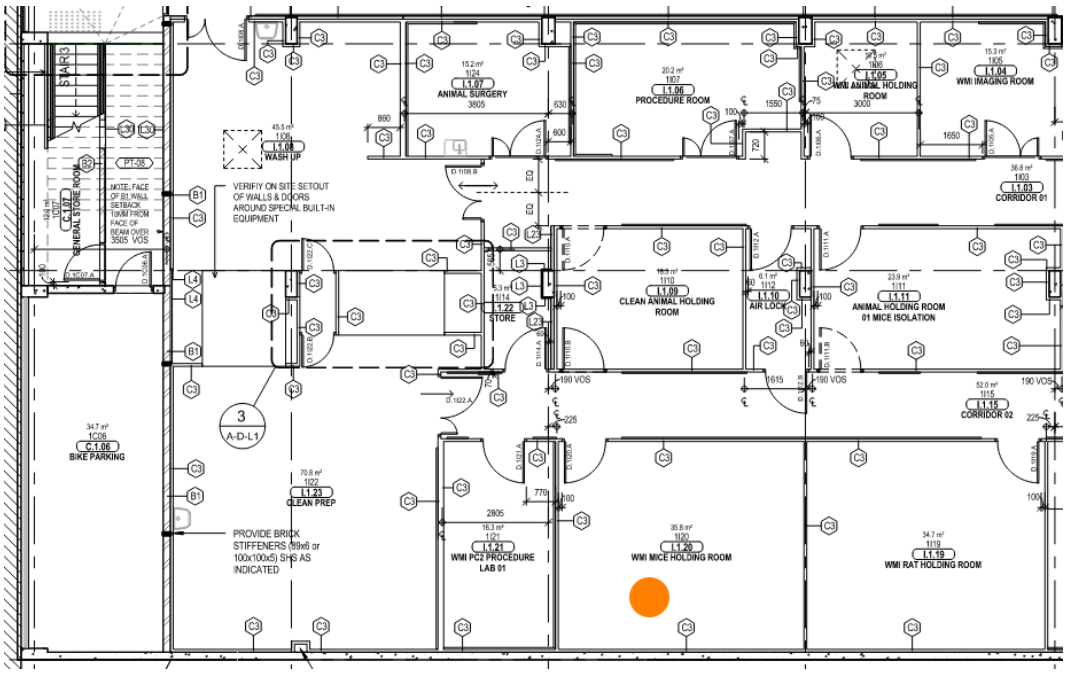

Figure 3: WIMR - BSF Mice Holding Room - Rack vibration monitor location

Monitoring at this location utilises a GeoSIG GMSplus with a GeoSIG VE-11 geophone. The calibration certificate for the geophone is included in Appendix A.

3. Recorded Data

Figure 4 below shows the vibration levels (RMS velocity) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.18mm/s (V_{RMS}) is shown in red.

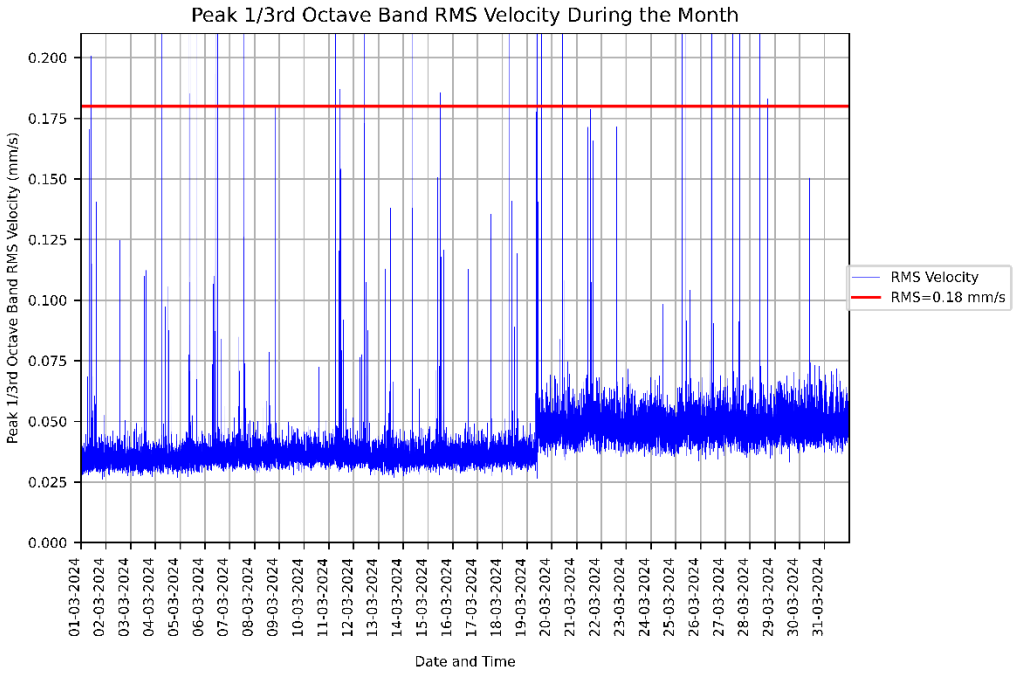

Figure 4: Measured RMSV vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Rack.

The table below summarises the number of RMS Velocity limit exceedances recorded during and outside of construction hours.

During Construction Hours	Outside of Construction Hours
32	5

Figure 5 below shows the peak particle vibration levels (PPV velocity) recorded between 01/03/2024 and 31/03/2024. The recorded data is shown in blue, while the limit of 0.6mm/s (V_{PPV}) is shown in red.

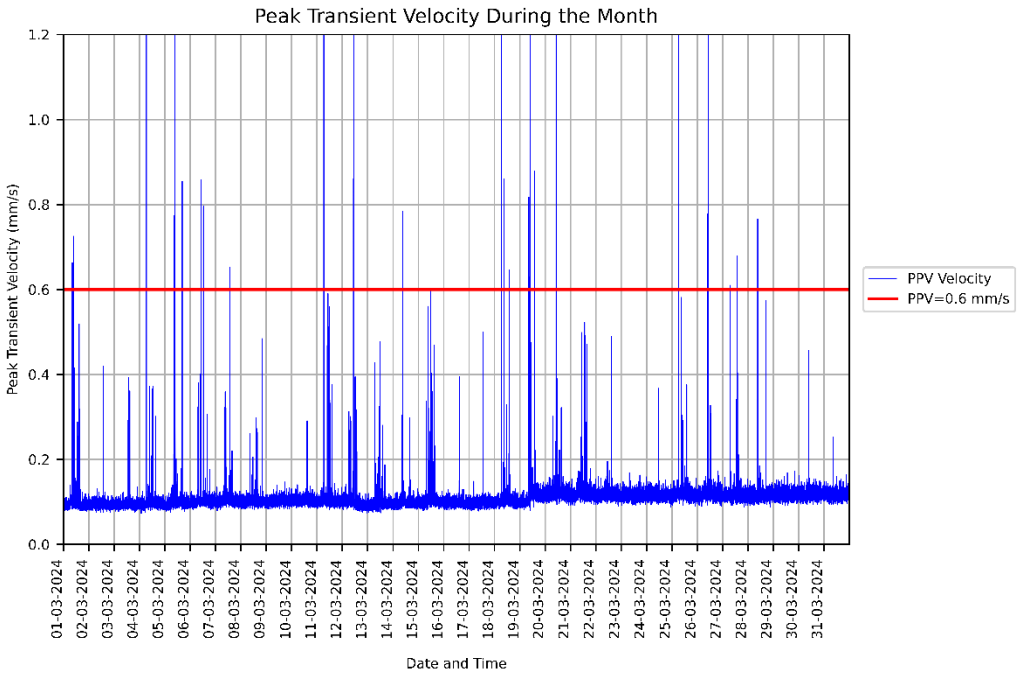

Figure 5: Measured PPV vibration levels for 01/03/2024 to 31/03/2024 at the WIMR - BSF Mice Holding Room - Rack.

The table below summarises the number of PPV limit exceedances recorded during and outside of construction hours.
