APPENDIX B – VIBRATION MONITORING GRAPHS		18

1 INTRODUCTION

This report presents the results of noise and vibration monitoring conducted by Acoustic Logic for the Shoalhaven Hospital Redevelopment project site. Details presented in this report include monitoring locations, relevant noise and vibration objectives, measured levels over the monitoring period and discussion of results.

This report presents the results of monitoring for the month of September between 1/9/2024 and 30/9/2024. Monitoring has been ongoing since 29th May 2023.

This report should be read in conjunction with the Construction Noise and Vibration Management Sub Plan prepared by this office (ref: 20230220.1/0506A/R1/VF, dated 05/06/2023)

2 SITE DESCRIPTION

The project site is located at Shoalhaven Hospital Redevelopment. Site works are now at the building construction stage.

2.1.1 Surrounding Receivers

Based on site investigations, the following developments surround the site:

Table 1 – Sensitive Receivers

Receiver (Refer Figure 1)	Receiver Type	Comment
R1	Residential	Detached dwellings to south of North Street, and residences and St Michaels Catholic Church and school to the east.
R2	Residential	Detached dwellings to north east, opposite Shoalhaven Street with some health and commercial and recreational uses.
PS	School	Shoalhaven Community Pre-School (future relocated site).
CC	Hospital	Cancer Centre overnight accommodation (part of the greater hospital site).

Figure 1 – Site Map. Monitoring Locations and Surrounding Receivers

3 MONITORING LOCATIONS AND DESCRIPTION

Refer to Figure 1 and photos below for monitoring locations.

Figure 2 – Noise and Vibration Monitor at East Boundary Opposite Shoalhaven Street

Figure 3 – Noise and Vibration Monitor at North Boundary Near Block A and B

3.1 MONITORING PERIOD

This report presents the results of monitoring between 1/9/2024 and 30/9/2024.

Monitoring has been ongoing since 29th May 2023.

3.2 MONITORING EQUIPMENT

Noise

Noise monitoring was conducted using SiteHive Hexanode monitors. Monitors are programmed to continuously store noise data over every 15-minute period, along with any 'triggered' events that occur throughout the monitoring period.

Vibration

Vibration monitoring was conducted using Texcel ETM vibration monitors with external Tri-axial Geophones. The vibration monitors are programmed to store statistical vibration data over every 5-minute period, along with any 'triggered' events that occur throughout the monitoring period. Texcel monitors are equipped with the ability to send SMS alarm messages to site operators and project managers.

4 NOISE AND VIBRATION OBJECTIVES

4.1 PROJECT DOCUMENTATION

Construction impacts to nearby development have been determined in the Construction Noise, Dust and Vibration Management Sub Plan (ref: 20230220.1/0506A/R1/VF, dated 05/06/2023)

4.1.1 Noise Management Levels (NML)

The project specific NML's for the most impacted receivers are summarised from the Sub-Plan and are reproduced as follows:

Table 2 – Noise Management Levels for Most Impacted Receivers

Location/Receiver	RBL dB(A) L ₉₀	NML dB(A) L _{eq}	HANML dB(A) L _{eq}
Residents Surrounding the Project Site	35	45 (Standard Construction Hours) 40 (OOSH)	75
Cancer Centre Overnight Stay	N/A	65	N/A
Hospital Wards and Operating Theatres (internal)	N/A	45 internal* 65 external	N/A

* An external noise level of 65 dB(A) would result in an internal noise level of 45 dB(A) assuming a typical 20 dB(A) reduction for a standard façade. Therefore, compliance with the external NML will also result in compliance with the internal NML.

4.1.2 Vibration Management Levels

German Standard DIN 4150-3 (2016) provides a guideline for acceptable levels of vibration velocity in building foundations, to assess the effects of vibration on structures. The table give guidance on the maximum accepted values of velocity at the foundation and in the plane of the highest floor of various types of buildings, to prevent any structural damage.

The table below lists the peak particle velocity, which is the maximum absolute value of the velocity signals for the three orthogonal components. This is measured as a maximum value of any of the three orthogonal component particle velocities when measured at the foundation, and the maximum levels measured in the x- and y-horizontal directions in the plane of the floor of the uppermost storey.

It is noted that if measured vibration levels are below the guidelines listed below, damage that will reduce the serviceability of the building will not occur and if damage to the building does occur, it is assumed that the damage is related to other activities or sources. Furthermore, the DIN4150-3 guideline states the following regarding the limits presented in Table 1 of the standard:

"Exceeding the guideline values does not necessarily lead to damage. Should they be exceeded, however, further investigations may be necessary, such as determining and evaluating the stresses as detailed in 4.3 and 4.4."

Table 3 -(Table 1 – DIN 4150-3 (2016)) – Guideline Values for Vibration Velocity, $v_{i,max}$, for Evaluating the Effects of Short-Term Vibration on Structures

	TYPE OF STRUCTURE	Guideline values for $v_{i,max}$ in mm/s				
		Foundation, all directions, $i = x, y, z$, at a frequency of			Topmost floor, horizontal direction, $i = x, y$	Floor slabs, vertical direction, $i = z$
		1Hz to 10Hz	10Hz to 50Hz	50Hz to 100Hz ^(a)	All Frequencies	All Frequencies
L/C	1	2	3	4	5	6
1	Buildings used for commercial purposes, industrial buildings, and buildings of similar design	20	20 to 40	40 to 50	40	20
2	Residential buildings and buildings of similar design and/or occupancy	5	5 to 15	15 to 20	15	20
3	Structures that, because of their particular sensitivity to vibration, cannot be classified under lines 1 and 2 and are of great intrinsic value (e.g. listed buildings) buildings that are under a preservation order)	3	3 to 8	8 to 10	8	20 ^(b)

NOTE Even if guideline values as in line 1, columns 2 to 5, are complied with, minor damage cannot be excluded.

a At frequencies above 100 Hz, the guideline values for 100 Hz can be applied as minimum values.

b It may be necessary to lower the guideline value markedly to prevent minor damage

5 MEASUREMENT RESULTS

5.1 NOISE MONITORING RESULTS

The following tables present a summary of daily measured noise levels across a 15-minute period. Refer to appendices for detailed noise monitoring results.

Standard construction hours are as follows:

- Monday to Friday between 7am and 6pm
- Saturday between 8am and 1pm

Note: all presented noise levels are measured at the monitoring location. Noise levels at surrounding receivers are likely to be lower given they are located further away.

NML = Noise Management Level

HNAML = Highly Noise Affected Management Level

A discussion will be provided where exceedances of the highly affected noise management level occur.

5.1.1 East Boundary Facing Shoalhaven Street (Monitor HEX-000171)

Table 4 – Monitored Noise Levels – East Boundary(HEX-000171)

Date	Noise Management Trigger Level dB(A) $L_{eq,15-min}$	NML Exceedance Range ($L_{Aeq, 15-min}$ dB(A)) – Standard Operating Hours

29/09/2024	0.1		Yes
30/09/2024	0.3		Yes

5.3 DISCUSSION

5.3.1 Noise

East Boundary Opposite Shoalhaven Street (HEX-000171)

Works were typically above the Noise Management Level and were generally below the Highly Noise Affected Management Level over the monitoring period.

Where measured exceedances above the 'highly-noise affected' management level have occurred along the east boundary throughout the monitoring period, these are detailed below:

- 16th September -- maximum noise level of 78 dB(A) $L_{eq(15min)}$
- 17th September -- maximum noise level of 77 dB(A) $L_{eq(15min)}$
- On all other dates, periods where the HNAML was exceeded were generally short (15-30 minutes) and were preceded and followed by periods of quieter noise levels.

North Boundary Near Block A and B (HEX-000130)

Works were generally below the Noise Management Level over the monitoring period and were all below the Highly Noise Affected Management Level over the monitoring period.

5.3.2 Vibration

North Boundary Near Block A and B (ETM7687)

- Across all works within this monitoring period, maximum vibration levels were generally within acceptable levels.

Where exceedances have occurred, these are summarised below:

- 5th September
 - One exceedance of the DIN4150 curve at approximately 8:00am from works near to the north boundary adjacent to the monitor, and maximum recorded PPV of 21.3mm/s
 - Further analysis indicates the exceedance was an isolated event and its waveform did not represent a typical construction waveform, thus it was considered to be an extraneous event as a result of handling or disturbing of the sensor.

East Boundary Opposite Shoalhaven Street (ETM7326)

- Across all works within this monitoring period, maximum vibration levels were generally within acceptable levels.

Where exceedances have occurred, these are summarised below:

- 13th September
 - Five exceedances of the DIN4150 curve between approximately 8:00am, 10:30am and 1:45pm at the monitor, with a maximum recorded PPV of 16.8mm/s
 - Based on communication with the site managers, there was no machinery working in that area on that day and upon further review of the recorded waveforms which did not represent typical construction, the recorded events are considered extraneous.

5.3.3 General Notes:

- Regarding measured exceedances generally, we note that an exceedance of the noise management level is not necessarily prohibited, however is a trigger for providing mitigation measures for the control of noise from construction activities.
- It should be noted that the measured noise levels will also capture noise outside the project site, such as environmental / traffic noise. Noise from construction activity at nearby residential receivers are expected to be lower than measured values given:
 - Receivers are setback further from the project site
 - The hoarding located along the site boundary will provide at minimum a line-of-sight barrier effect to residents along Shoalhaven Street with approximately 5-10dB noise reduction from the measured levels.
- We note that given the monitors were installed at ground level within site boundaries, any measured vibration levels are likely to be elevated compared to vibration levels at the receiver locations as they are located further away from the vibration source(s).

6 CONCLUSION

Noise and Vibration monitoring has been conducted at various locations for the Shoalhaven Hospital Redevelopment between 1/9/2024 and 30/9/2024. For this monitoring period, we note the following:

Noise

- East Boundary Opposite Shoalhaven Street (HEX-000171) – measured noise levels generally exceeded the NML, however, were generally below the HNAML over this monitoring period.
- North Boundary Near Block A and B (HEX-000130) - noise levels were generally below the NML over this monitoring period.

Vibration

- East Boundary Opposite Shoalhaven Street (ETM7687), vibration levels were all within the nominated criteria during this monitoring period, except for some extraneous events not relating to typical construction activities.
- North Boundary Near Block A and B (ETM7326), vibration levels were all within the nominated criteria during this monitoring period, except for some extraneous events not relating to typical construction activities.

We trust this information is satisfactory. Please contact us should you have any further queries.

Yours faithfully,

Acoustic Logic Pty Ltd
Hyde Deng

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 20-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 21-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 21-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 22-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 22-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 23-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 23-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 24-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 24-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 25-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 25-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 26-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 26-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 27-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 27-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 28-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 28-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 29-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 29-09-2024

Daily Monitored Vibration Levels at North Boundary Near Block A and B (ETM7687) on 30-09-2024

Frequency Content of Vibration Levels at North Boundary Near Block A and B (ETM7687) on 30-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 1-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 1-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 2-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 2-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 3-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 3-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 4-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 4-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 5-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 5-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 6-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 6-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 7-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 7-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 8-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 8-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 9-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 9-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 10-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
10-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 11-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
11-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 12-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
12-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 13-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
13-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 14-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
14-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 15-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
15-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 16-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
16-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 17-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
17-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 18-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
18-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 19-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
19-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 20-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
20-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 21-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
21-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 22-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
22-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 23-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
23-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 24-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
24-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 25-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
25-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 26-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
26-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 27-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
27-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 28-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
28-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 29-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
29-09-2024

Daily Monitored Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on 30-09-2024

Frequency Content of Vibration Levels at East Boundary Opposite Shoalhaven Street (ETM7326) on
30-09-2024
