Re: PM10 and PM2.5 Monitoring October 2023 – Westmead Hospital

Compliance Health & Environmental Consulting (CHEC) were engaged by Kane Constructions Pty Ltd to undertake PM10 and PM2.5 dust monitoring during construction works at Westmead Hospital, Westmead.

Construction is being undertaken adjacent to the children’s hospital and monitoring was necessary to ensure control measures were adequate to minimise dust generation.

Criteria and monitoring methods have been adopted from the National Environment Protection (Ambient Air Quality) Measure, 2021. The criteria are presented below:

Table 1 – 24hr and Annual Average Criteria for PM2.5 and PM10 Dust ($\mu\text{g}/\text{m}^3$)

	PM 2.5	PM10
24hr Average	25	50
Annual Average	8	25

Monitoring for the Site commenced on the 4th April 2023 when an Airmet DX-2 monitoring unit was installed adjacent to the air conditioning intake for the hospital, as shown on **Figure 1** – Monitoring Location. This monitor was Sited in accordance with AS/NZS 3580.1.1:2016, as required by NEPM, 2021.

During the month of October, the 24hr average criteria was not exceeded for PM10 or PM2.5. PM10 24hr average concentration were recorded well below the criteria with a maximum concentration of 20.7 $\mu\text{g}/\text{m}^3$. Likewise, PM2.5 24hr average concentrations were measured at a maximum of 12.3 $\mu\text{g}/\text{m}^3$, significantly below 25 $\mu\text{g}/\text{m}^3$.

The monitoring data for the month of October 2023 is considered compliant with relevant criteria. Refer to **Figure 2** – PM10 October Monitoring Data and **Figure 3** – PM2.5 October Monitoring Data.
