Re: PM10 and PM2.5 Monitoring April 2023 – Westmead Hospital

Dear Sir,

Compliance Health & Environmental Consulting (CHEC) were engaged by Kane Constructions Pty Ltd to undertake PM10 and PM2.5 dust monitoring during construction works at Westmead Hospital, Westmead.

Construction is being undertaken adjacent to the children's hospital and monitoring was necessary to ensure control measures were adequate to minimise dust generation.

Criteria and monitoring methods have been adopted from the National Environment Protection (Ambient Air Quality) Measure, 2021. The criteria are presented below:

Table 1 – 24hr and Annual Average Criteria for PM2.5 and PM10 Dust ($\mu\text{g}/\text{m}^3$)

	PM 2.5	PM10
24hr Average	25	50
Annual Average	8	25

An Airmet DX-2 monitoring unit was installed on the 4th April 2023 adjacent to the air conditioning intake for the hospital, as shown on **Figure 1** – Monitoring Location. This monitor was Sited in accordance with AS/NZS 3580.1.1:2016, as required by NEPM, 2021.

During the month the 24hr average criteria was not exceeded for PM10 or PM2.5; however, several spikes to a maximum value of 288.4 $\mu\text{g}/\text{m}^3$ of PM10 and 202.5 $\mu\text{g}/\text{m}^3$ for PM2.5 were observed for the 1-minute intervals.

The spikes were exclusively noted to be during the night, or out of working hours. No explanation has been provided to date as to why these events have occurred; however, the circumstance should be considered during future monitoring events if exceedances are observed.

The monitoring data for the month of April 2023 is considered compliant with relevant criteria. Refer to **Figure 2** – PM10 April Monitoring Data and **Figure 3** – PM2.5 April Monitoring Data

Regards,

Jayden Gross
